THINK BIG, TRAVEL IN THE BIGSTER

Experience the city and adventure in full with Dacia Bigster. An SUV with a powerful design and bold graphic lines, it features a generous boot and an exceptionally spacious interior: up to five people can travel! Its electric engine range suits all uses: hybrid and 4x4. Bigster, better than a new SUV, an unprecedented offer the likes of which only Dacia can develop.

ASSERTIVE SUV CHARACTER

Dacia Bigster boasts modern lines and volumes for maximum robustness and interior space. The dynamic front end stands out with its sculpted bonnet and lighting signature, including the iconic Dacia Link logo. On the exterior, the Starkle® wheel arches and side protectors underline the SUV's outdoor capability.

Featuring a panoramic opening sunroof(1) providing unique interior light, its exclusive Indigo Blue exterior colour adds an additional touch of distinction. There's a Bigster for everyone.

INTERIOR EXPERIENCE DESIGNED FOR YOU

Spacious and entirely designed for your comfort, the passenger compartment offers a contemporary environment incorporating two screens that share information to make driving easier: 10" digital dashboard for driving data[1], 10.1" central touchscreen for multimedia system management and vehicle settings. An elegant green line connects the two screens to incorporate them seamlessly into the dashboard.

Numerous details give the on-board ambience its elegance: quality of finishes and refined textures. The air vents use the exterior graphic of the Y-shaped brand light. The embossed Dacia emblem on the microcloud TEP upholstery adds a touch of exclusivity.

On the Extreme version, copper-brown air vents

(1) On Extreme and Journey versions.

HYBRID ENGINES

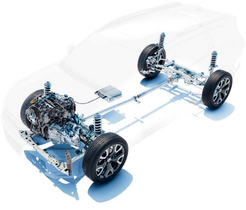
Dacia Bigster offers you something new with mild hybrid or full hybrid engines such as the new hybrid 155 engine derived from Renault Group research and development: to provide instant acceleration when in EV mode.

The mild hybrid 140 petrol engine or mild hybrid 130 for the 4x4 version reduce fuel consumption and boost performance at all times.

Take control of the road in any situation with the 4x4 version of the mild hybrid 130 petrol engine. Thanks to its 5 driving modes that are easy to select via the 4x4 mode selector, you can tackle any situation, even on difficult terrain.

4x4 driving mode selector

155 HYBRID ENGINE
Maximise your journeys with the hybrid 155 engine, harnessing the dual technology of petrol and electric to deliver instant acceleration in EV mode.



MILD HYBRID 140 AND 130 4X4 ENGINES
The electrical system supports the engine during acceleration and starting for a better feel and to limit consumption.

(1) Compared with an equivalent petrol engine.

CONFIGURE AND ORDER

MORE SPACE, MORE BIGSTER

Enjoy the generous welcome of Bigster's five seats. Set the height that works for you and tilt it forwards or backwards to your favourite seating position. Lumbar adjustment optimises comfort in both seats. With the hybrid 155 engine, the Journey and Extreme versions feature a high centre console with a refrigerated storage compartment.

In the rear, passengers can enjoy best-in-class knee and head room. The 40/20/40 split-folding bench seat with a centre seat that folds down into an armrest reinvents comfort and increases loading possibilities.

With the Hybrid 155 engine, the journey and extreme versions feature a console with a wireless charger, cup holders and a refrigerated compartment.

Front refrigerated storage

Dacia Bigster is also even more versatile thanks to its large boot with a maximum capacity that can reach up to 677 litres. The electric tailgate[1] opens automatically, simplifying your everyday business and leisure task.

Remarkable boot volume up to 677 litres

Powered tailgate[1]

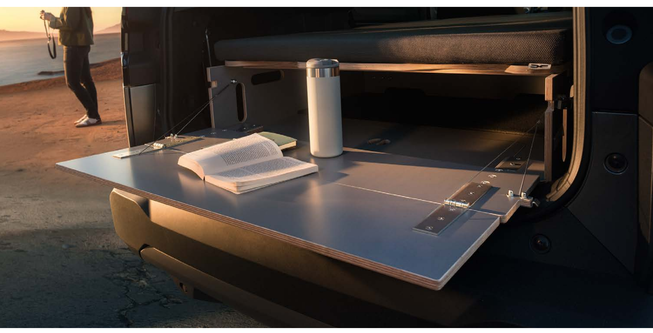
(1) standard on Journey.

ALWAYS THE RIGHT EQUIPMENT

YouClip optimises your comfort and storage space with its clever multi-purpose attachment system for hanging the wide variety of accessories available in the range. These clip onto the mountings provided in the passenger compartment and boot: up to five mountings as standard. Two additional attachment points behind the headrests are available as an accessory to extend the possibilities to seven YouClip points.

Explore outdoor activities with the Dacia InNature range of accessories. With the Sleep Pack that fits into the Bigster's boot, you can enjoy a double bed (1.90 metres long and 1.30 metres wide), a handy shelf and storage space. The InNature roof rack is the perfect place for your luggage and extra leisure equipment. It is easily attached to the modular roof bars.

InNature range: integrated bed system and a new discovery, the adaptable tent



The kit can also be used as a picnic tablet or as a storage space*

*Depending on the version.

CONNECTED FEATURES

Information relating to driving and the new Media Nav Live multimedia system is displayed on the 10" digital dashboard[1] and 10.1" central touchscreen. Enjoy in-car navigation or mirroring from your smartphone, with real-time traffic information and up-to-date mapping for 8 years.

Designed for the pleasure of five passengers, the interior ambience benefits from controlled soundproofing and the Arkamys® 3D sound system with 6 speakers.

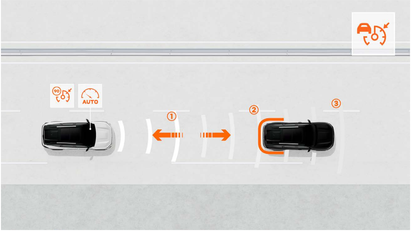
For your peace of mind, the wireless smartphone charger[2] lets you stay connected at all times. Also keep all the Dacia services concerning your vehicle at your fingertips thanks to the My Dacia app.

Full monitoring of your Bigster with the My Dacia app

(1) Available on Extreme and Journey versions. (2) On extreme and journey versions.

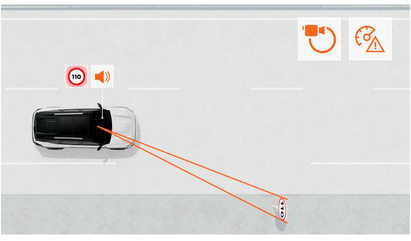
DRIVE IN COMPLETE SAFETY

To complete the range of equipment already on board for your safety and driving comfort, Dacia Bigster is equipped with 13 new-generation driver-assistance systems. You can disable some of these features at any time by clicking on the My Safety button. With Dacia, peace of mind is with you every step of the way.

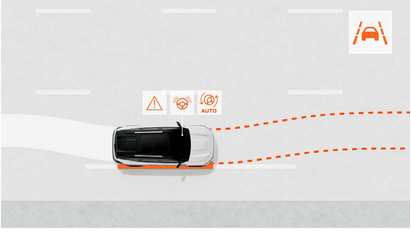


ADAPTIVE CRUISE CONTROL[1]
Let your cruise control maintain a safe following distance between you and the vehicle in front. The brakes are applied if the distance is too short and the car accelerates again when the traffic becomes more fluid.

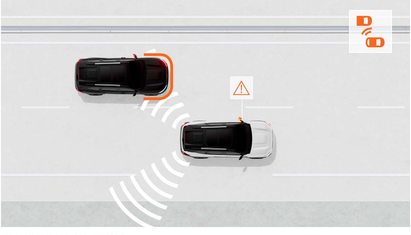
DRIVER FATIGUE DETECTION SYSTEM
The driver fatigue detection system analyses steering wheel movements as well as other parameters such as speed or journey time. It is able to assess the driver's level of fatigue and detect signs of drowsiness. If necessary, it triggers an audible or visual alert to encourage the driver to take a break. This system can be customised via the My Safety settings. It is also possible to disable it completely.



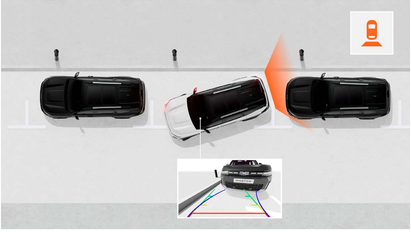
TRAFFIC SIGN RECOGNITION WITH SPEEDING ALERT
This system provides a reliable real-time indication of the maximum speed on the road and warns the driver if they exceed the speed limit with visual and audible alerts (which can be disabled). If the cruise control or speed limiter are enabled, the system suggests that if the speed limit is changed, it can be confirmed as the new set speed.



LANE KEEPING ASSIST WITH LANE CHANGE WARNING
This system monitors the vehicle's trajectory in its lane and warns the driver if the vehicle crosses a white line unintentionally. If necessary, it can also correct the vehicle's trajectory by automatically operating the steering.



BLIND SPOT WARNING
This system monitors the driver's restricted field of vision and warns drivers by means of a visual signal if there is another vehicle or road user in their blind spot, enabling them to change lanes safely.



MULTIVIEW CAMERA
The MultiView Camera gives you more eyes! It provides front, rear and side views, helping you detect holes, rocks or obstacles that are not always easy to see, and making driving easier for you.

(1) Standard on Extreme and Journey hybrid 155 only.

(1) Petrol engines with particulate filter (DPF): to reduce particle emissions, the new direct injection petrol engines now include a particle filter in the exhaust line. The filter removes particles in the exhaust gases, then burns them using automatic and very regular regeneration. The particulate filter requires no maintenance. (2) The vehicle's starter and battery are adjusted for use with the Stop & Start system. (3) Official consumption and emissions according to applicable regulations. (4) WLTP (Worldwide Harmonised Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared with the NEDC protocol. CO_2 emissions are certified in accordance with a standardised and regulatory method. This method is identical for all manufacturers and enables vehicles to be compared with one another. (5) The payload indicated is for the lowest equipment level. (6) According to ISO standard 3832.
*Cannot be combined.
