

ALPINE F1 TEAM ENVIRONMENTAL POLICY

The Alpine F1 Team is dedicated to:

COMPLIANCE WITH ENVIRONMENTAL STANDARDS

We are fully committed to adhering to all relevant environmental laws, regulations, and standards. As a Formula 1 team, we recognise our responsibility to meet compliance requirements dictated by governance standards, including legislation, regulations, and stakeholder expectations.

SUSTAINABLE PRACTICES

We are dedicated to embedding sustainability into every aspect of our operations by promoting the responsible use of resources, reducing waste, increasing waste stream efficiency, and minimising emissions. We will calculate our emissions annually and set environmental goals and objectives as part of our journey toward carbon neutrality. Continuous assessment and improvement of our environmental performance, coupled with regular progress reviews, are central to our approach.

ECOSYSTEM PRESERVATION

Operating in the Oxfordshire countryside, we pledge to preserve the green and protected land on our site, safeguard natural habitats, and promote biodiversity in areas impacted by our operations and site developments. Additionally, we actively support conservation initiatives within the communities where we operate and maintain positive relations with our neighbours.

We are dedicated to the ongoing enhancement of our environmental practices. This includes the consistent improvement of environmental aspects, the adoption of industry best practices, and strict adherence to the ISO 14001 Standard through the effective implementation of our Environmental Management System.

The management team is fully committed to upholding this policy and requires that all employees, contractors, and agents working for or on behalf of the Alpine Formula One Team actively contribute to its successful execution. This collective effort ensures that our environmental commitments are not only met but continuously strengthened, reflecting our dedication to sustainability at every level of our organisation.
