

Tender book – public offer request for:

Project: «Expansion of vehicle production capacity»

Lot 8 : Paint shop Building

- The purpose of the consultation
- Planning

## *The purpose of the consultation*

- Construction of a new Paint Shop Building which has a footprint area 11.305 m<sup>2</sup> and unfolded area 14.545 m<sup>2</sup> , height regime: ground floor + 1 partial floor (G floor + Partial), with height max at the attic = 29 m and free height under the base farm 16 m, where the installations specific to the technological process of body painting will be implanted.
- Line capacity :  
The line will provide a manufacturing cadence of +11 vehicles/h after project implementation, predisposed to +15 vehicles/h.
- The installations related to the building (ventilation, air conditioning, lighting, power stations and transformer stations, energy consumption metering ...) will be monitored through the GTC (Centralized Technical Management) system existing at the Dacia Power Dispatch.
- The technical project will be made available by Dacia Automobile.

- Order : W18 2019 (24 april - 03 may)
- Starting construction work : W19 2019 (06 may - 10 may)
- EPB (Starting Assembly Process Installations) : W48 2019 (end november)
- Deadline construction : W09 2020 (end february)
