ELECTRIFIED MOBILITY FOR ALL

As pioneers of electrified mobility, Renault benefits from over a decade in the design, manufacture, sales and aftersales servicing of E-Tech vehicles. Renault was the first to believe in 100% electric powertrains, and continues to lead the way today. Our 100% electric cars remain the most prevalent on European roads, totalling over 20% of all electric vehicles driven and more than 400,000 sold.

Today, Renault offers one of the most comprehensive choices of electrified models in the market. Now, with the newly launched Renault 5 E-Tech electric - a model with a design set to win the hearts of many - we're excited to expand our electric range even further. The fully electric Scenic E-Tech electric and Megane E-Tech electric are capable of up to 379 and 285 miles, respectively, while the Clio, Captur, Austral, and Arkana are available in full hybrid E-Tech powertrains, all offering lower running costs, reduced tailpipe emissions, and enhanced driving pleasure.

You now have more choice than ever with the Renault line up, wherever you are on your electrified mobility journey.

Experience the range for yourself by contacting your local Renault dealer.
