ELECTRIFIED MOBILITY FOR ALL

As pioneers of electrified mobility, Renault benefits from over a decade in the design, manufacture, sales and aftersales servicing of E-Tech vehicles. Renault was the first to believe in 100% electric powertrains, and continues to lead the way today. Our 100% electric cars remain the most prevalent on European roads, totalling over 20% of all electric vehicles driven and more than 400,000 sold.

Today, Renault offers one of the most comprehensive choices of electrified models in the market. The fully electric Scenic E-Tech 100% electric and Megane E-Tech 100% electric are capable of up to 379 and 280 miles respectively. Clio, Captur, Austral & Arkana are available in E-Tech full hybrid powertrains. All offer lower running costs, reduced tailpipe emissions and enhanced driving pleasure.

You now have more choice than ever with the Renault line up, wherever you are on your electrified mobility journey.

Experience the range for yourself by contacting your local Renault dealer.

Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP fuel consumption and CO₂ figures are used to calculate Vehicle excise Duty on first registration and Company Car Tax Benefit in Kind. For more information on CO₂ banding and Company Car Tax Benefit in Kind go to www.cartax.renault.co.uk. Please visit renault.co.uk/configure for WLTP figures for any selected options.
