AC: alternating current. DC: direct current. (1) WLTP figures shown for comparability purposes only. Actual real world driving results may vary depending on factors including the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load / source: internal Renault, 2025, techno version. (2) the size of the wheel rims may affect the vehicle's driving range. (3) maximum power and charging times are based on optimal charging conditions for the vehicle and for the charging point (peak power). The maximum power accepted by the battery (mainly in DC charging) varies depending on the battery's state of charge and the exterior temperature. Range communicated in WLTP cycle.
