built to fit your business

The award-winning Renault Master is available in diesel and E-Tech electric, with platform and chassis cab options ready for conversion through our network of over 30 certified partners.

Choose from off-the-shelf conversions like Luton Box Vans and Aluminium Tippers, developed in the UK to meet Renault's high standards — or explore other conversions tailored by our Renault certified converter partners.

From campervans to refrigerated vehicles, our range goes beyond the Master, offering, high-quality conversions across the entire Renault LCV line up.

easy to convert

Renault Master Chassis and Platform Cabs are available in two lengths and in single or double cab configurations, with a choice of diesel or E-Tech electric powertrains — equipping you with a range of options for your conversion needs.

new design

Designed from the ground up Renault Master's striking new exterior and driver centric cabin provides the perfect combination of efficiency and comfort.

The tilt of the windscreen, the air intakes and the shape of the wing mirrors are all key design elements to enhance the vehicle's aerodynamic performance.

Whilst the interior combines an innovative driving position with an s-shaped dashboard for easy-to-access controls. A workspace focused on your needs: mobile office with connectivity, USB-C* and 12V sockets, reinforced upholstery covering for optimised durability.

Enjoy a 10" screen equipped with openRlink multimedia system and the Google built-in option*. A fluid and intuitive interface that supports you on all your trips.

*optional

02. design and technology

driving range

Renault Master Conversions are available in 150 and 170 dCi diesel engines with manual and 9-speed automatic gear box options.

combustion engines	Blue dCi 150	Blue dCi 170 Auto
certification category	N1	
capacity (cm ³)/number of cylinders/valves/S&S	16/04/1998/yes	
max. power kW CEE (hp) at rpm	110 (150) at 3,500	125 (170) at 3,500
max. torque Nm CEE at rpm	360 at 1,500	380 at 1,500
emission standard	Euro VI and Euro 6ebis	
top speed mph (km/h)	106 (162)	110 (177)
certification protocol	WLTP	
min-max WLTP combined CO ₂ emission gr/km	196-268	196-268
combined cycle consumption mpg	37.7 - 25.7	36.2 - 24.6
tank capacity	80L	
max. driving range in miles	636	

Whilst the E-Tech electric powertrain provides ranges of up to 285 miles using the 87kW battery.

E-Tech engines	electric
max. power kW EEC (hp)	105(140)
max. torque EEC-Nm	300
energy recovery from braking	1 regenerative braking mode
service interval ⁽¹⁾	up to 24,000 miles/2 years
battery	
net storage capacity (kWh)	87
WLTP range (miles) ⁽²⁾	up to 255 miles (N1) up to 285 miles (N2)
type of charger	22kW AC with DC 130
performance	
maximum speed (mph)	90 for 4 t 120 for 3.5 t
certification protocol	WLTP ⁽²⁾

What is WLTP and why the real-life range is similar to it?Worldwide Harmonized Light Vehicles Test Procedures (WLTP), this homologation protocol gives fuel consumption and driving range results that are much closer to real life conditions figures than the NEDC protocol. While the old NEDC test determined test values based on a theoretical driving profile, the WLTP cycle was developed using real-driving data, gathered from around the world. WLTP therefore better represents everyday driving profiles.

Why is the range reduced in winter?Like all batteries, those in E-Tech electric vehicles are less efficient in cold weather than at warmer ambient temperatures. This means that you can expect a reduction in the range of your Master E-Tech electric in the winter. Also, in winter you are more likely to use the heating, which means Master E-Tech electric consumes more energy.

(1) service to be performed at 40,000 km or 2 years, whichever comes soonest.

(2) WLTP (Worldwide Harmonised Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared with the NEDC protocol.

off-the-shelf conversions

Our range of off-the-shelf products including Aluminium Tipper, Dropsides and Luton vans, are delivered as completed vehicles directly from our retailer network.

Renault Master dropside

Available in 2 lengths with both single and double cab versions.

Renault Master dropside comes with:

- 400mm anodised aluminum drop-sides and tailboard with over centre catches
- removable corner pillars and bolted gantry
- 15mm Containerdeck flooring
- 4 pairs of pull-up lashing rings*
- payload of up to 1,358kg

Renault Master tipper

Available with a payload of up to 1,289kg and both single and double cab versions, the Renault Master tipper features:

- 400mm high anodised aluminium extruded dropsides and tailboard
- dual-hinged rear corner pillars
- dark grey powder coated gantry with punched infill panel
- patented 18mm interlocking Tippadek aluminium flooring
- fully welded and galvanised sub and top frames
- underfloor scissor-action tipping ram with electro-hydraulic power pack
- 3 pairs of pull-up lashing rings*
- payload of up to 1,358kg

Renault Master Luton box van

With a load volume of up to 20m³ and a payload of up to 1,1188kg the Renault Master Luton box is the perfect vehicle for optimised transport of objects. It includes the over the cab storage head as standard and a flat loading floor.

Available with a Del 500kg column tail lift for easy loading.

Features:

- lightweight composite floor
- aerodynamic luton pod integration
- 2 lines of loadlock

03. off-the-shelf range

Renault Master Luton low loader

The Renault Luton Low Loader has been designed to make loading and unloading easy with its load height of 500mm.

With a fully integrated Luton head with interior shelf, it provides a load volume of up to 19m³ and a payload of up to 1,297kg.

With its 270° opening barn doors and rear step it is ideal for deliveries and removals.

Features:

- lightweight composite floor
- stainless steel door assembly
- interior height - 2200mm
- aero-dynamic integrated Luton head

03. off-the-shelf range

Escape Camper vans

Every Escape Renault Trafic Crusader is fully off-grid as standard, built with premium components, advanced lithium power and integrated solar for complete independence. Loaded with features, it's a campervan crafted without compromise.

Features:

- 2000w inverter & charger
- Lithium Pro (175ah) leisure battery
- Victron MPPT smart controller for solar power
- 200w Flexi solar panels
- Victron Orion 50amp DC/DC battery charger
- webasto diesel heating
- external shower point
- RIB 112 seating and bed
- handcrafted custom-made upholstery
- bespoke exterior styling & gloss detailing
- premium alloy wheels

Cool Kit Refrigerated Van

Features:

- GAH Rapier RF301 fridge unit – reliable refrigeration performance down to -18 °C
- air curtain technology – maintains internal temperature, reduces energy use, and improves access during multi-drop deliveries
- automatic LED load-area lighting – bright, instant illumination when doors open
- flexible load management – moveable folding bulkhead and LoadLok® 1806 rail system provide fast, adjustable, heavy-duty load restraint
- comprehensive load and body protection – pallet securing with reinforced floor protection, checkerplate side/rear door panels and wheelbox covers
- durable interior finish – hard-wearing, non-slip floor with aluminium skirting to protect lower wall edges from wear and impact
