Tailor-Made Solutions for your Business

Renault Curtainsider

TRUCKCRAFT
BODIES

Adapting to your profession

The MASTER Van has been specifically designed to adapt to the most demanding requirements. It is efficient with space, boasting load volumes of up to 17m³ and payloads of up to 1,551kg (3.5T versions) and 2,061kg (4.5T versions)[^]. It is practical, with a range of factory conversions to fit your needs, including Tippers and Luton vans. It is versatile, Platform and Chassis Cab versions can be converted into a vast array of other products, such as wheelchair access vehicles, minibuses, refrigerated vans and ambulances. It also makes your working day easier and safer, with electronic stability control (ESC) now standard on every version of the MASTER featuring Hill Start Assist, Grip Xtend and Trailer Swing Assist.

[^]Payload equals the Maximum Operating Mass (Gross Vehicle Mass or GVW) less the Kerb Mass. Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures.

Renault Tailor-Made Conversions

The Renault MASTER Curtainsider conversion is part of Renault's Tailor-Made Conversion range.

The range comprises of popular specialist vehicle types such as Refrigerated Vans, Minibuses, Grounds Maintenance Vehicles and Welfare vehicles.

The Tailor-Made range offers a standard specification based on the expert collaboration between Renault and our accredited converter partners.

The specifications have been developed to meet common requirements however, they can be adapted to suit specific customer requirements, providing a truly tailor made solution.

Our Tailor-Made range has been developed in partnership exclusively with converters who have received Renault approval after being assessed on their technical and quality standards by a dedicated team from Renault. A list of these can be found at www.conversions.renault.co.uk

About Truckcraft Bodies Ltd

Established in Greater Manchester in 2003, Truckcraft Bodies Ltd was founded upon many years of experience in the manufacture of commercial vehicle bodies by the Founder and current Managing Director, Paul Leary. Starting out, Paul envisaged a company that would rise above the rest by delivering not only a premium product with an emphasis on quality, but also exceptionally high levels of customer service; something he felt was lacking in the industry.

Over the past 15 years Truckcraft Bodies have built a solid reputation upon these founding principles and their name is now synonymous with quality truck bodies. Truckcraft Bodies have a team of highly skilled technicians that can work with you on your brief, from design to delivery, to ensure your vehicle body meets your precise needs. With a premium range of body types, they tailor to meet your requirements.

Truckcraft Bodies has embraced Vehicle Type Approvals. They were one of the first companies to achieve this and they now cover the majority of base vehicles. This helps them to ensure that all of their vehicle bodies are of the highest quality plus they all conform to ISO 9001:2015.
