Everything is simple when everything is electric. As standard, the 5m mode 3 charging cable is used on wallbox home charging points (1hr charge/50km range) and public charging points (20 mins/50km). For greater options, this cable is available in a 6.5m version as an accessory. Add the occasional-use flex charger cable for use with enhanced domestic socket (2hrs/50km) and/or the occasional-use domestic cable suitable for standard domestic sockets (3hrs 20 mins/50km). And for even greater convenience, get the special cable storage bag, cable handle or cable tie. And the cable storage false floor for a perfectly tidy boot!
