

Protection

Protect and decorate

Avoid small impacts and scratches on the bodywork, edges and door sills thanks to the transparent protection films. These films are available individually or as a complete pack. To help manoeuvre with ease, add parking sensors to your ZOE, which are perfectly integrated into the bumper. Inside, protection goes hand in hand with comfort and style with the comfort textile, premium textile or innovation Renault floor mats. Secured with clips, they also ensure the highest level of safety at the pedal unit level. Choosing accessories for ZOE means enhancing the style and protection of your vehicle, which is why we have mudflaps to protect your ZOE from flying debris.
