

New R-LINK 2 Software upgrade installation guide

This upgrade is **only compatible** with Renault vehicles equipped with R-LINK 2 multimedia systems where the **VIN number has been verified** on the multimedia website. Use the software only on this specific Renault. **Do not install it on another car.**

How to perform updates?

Check if there are any updates
for your vehicle

Download this update on a
USB stick

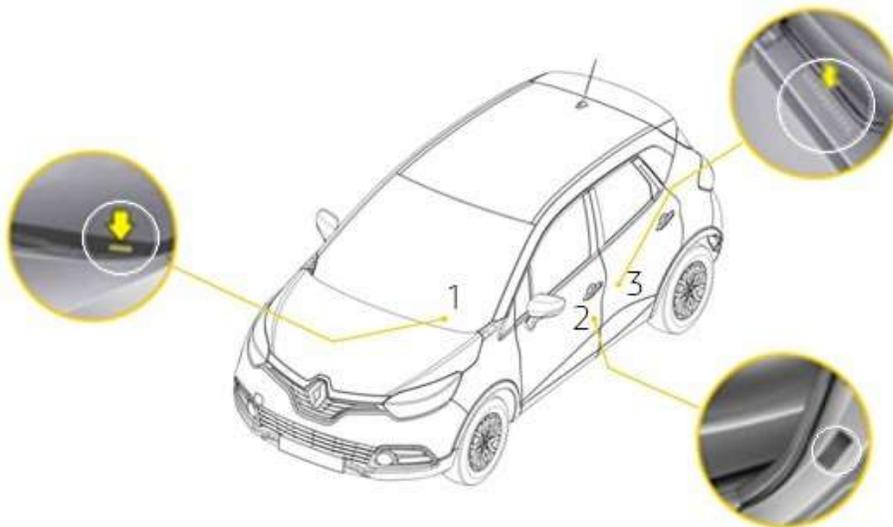

Plug this USB stick into your
connected system

Before you start: Get your VIN number ready

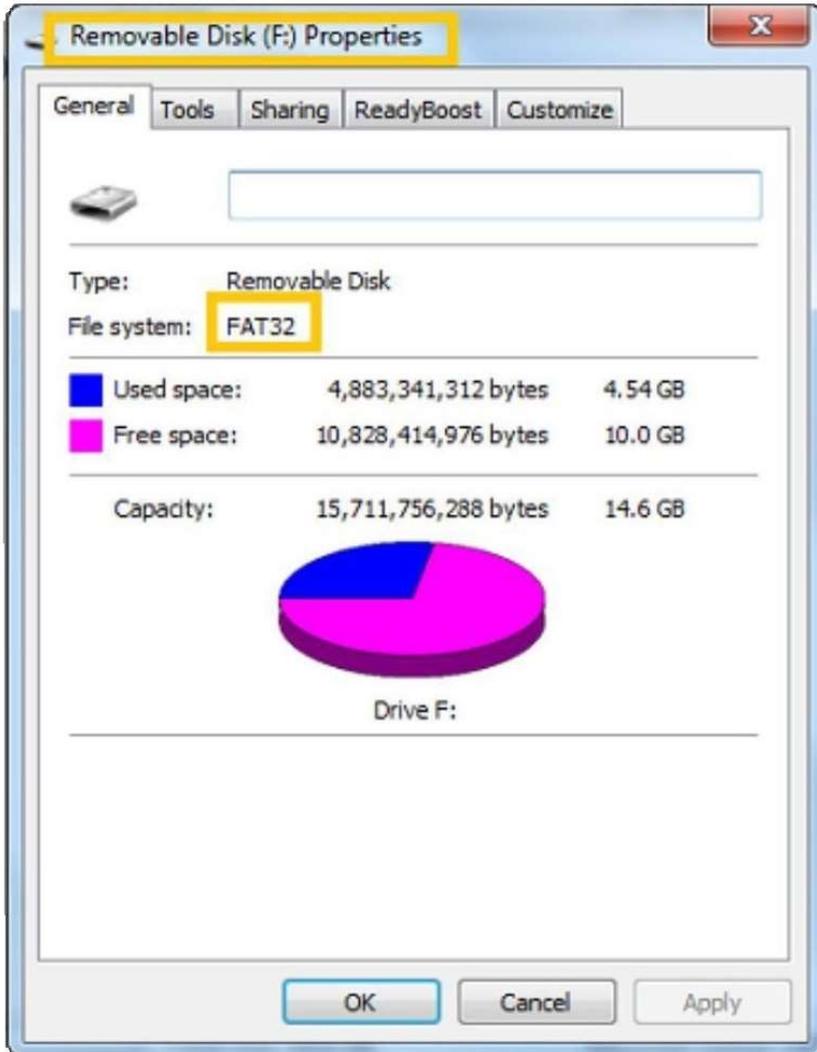

You can find your **VIN number** in your car or on your **V5 car registration document**. This information is mandatory to check if the software upgrade is available for your Renault vehicle. Please check the number. It must begin with VF and include 17 digits without any letters "i" nor "o".

Before you start: Find a USB stick in FAT 32 format (8GB-32 GB)

To check if your USB stick is in FAT 32 format access its properties (example: right click on PC/ properties).

Make sure that your internet connection is active during the whole process. Please **do not interrupt the download** whilst it is in progress.

Step 1: Download the software

1/4

Download the update: version
X.X.XX.XXX

 Download the update

Use the software only on this specific Renault car. Do not install it on another car.

Example screen. The version's number is indicated at the time of the download.

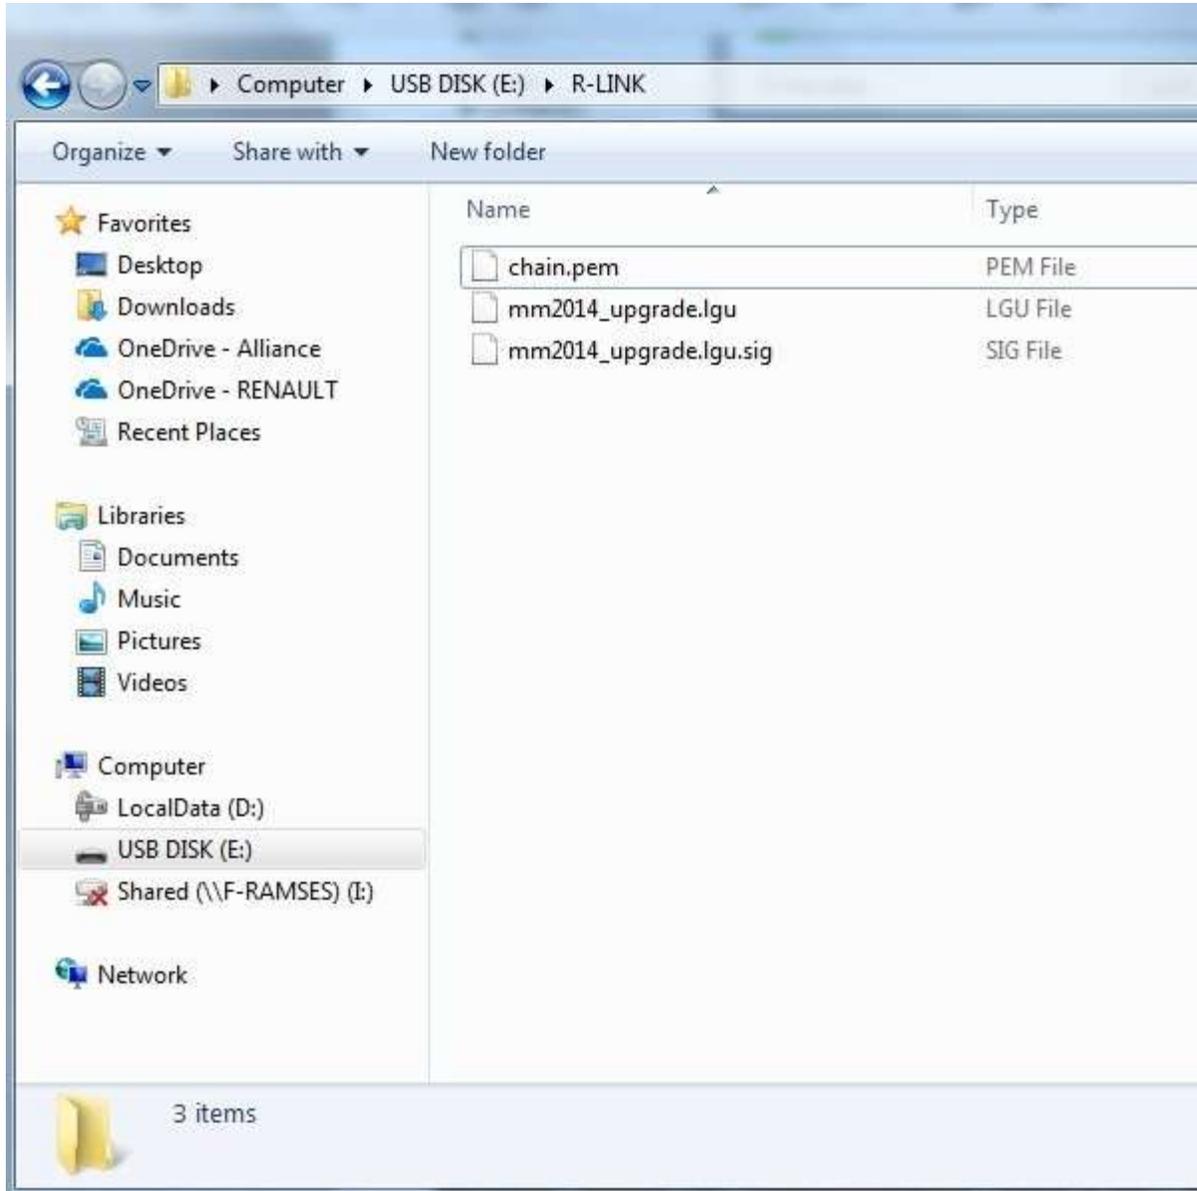

Step 2: Unzip the file

Unzip and “Extract” the file you have downloaded. You can use 7-zip (<http://www.7-zip.org/>) to do this. Then copy the **R-LINK** folder onto the USB key at the root. Keep the R-LINK folder exactly as it is. **Do not rename the folder nor install the software in another location on the USB stick.**

Step 3: View the downloaded file on your USB stick

The folder may contain several files. You can open the folder to check the software has been correctly copied.

Switch on the engine and your R-LINK 2 system. Plug in your USB stick. The software on your USB stick will be automatically detected after 3 minutes. **Please keep the engine running while the software installs.** It can take up to 10 minutes.

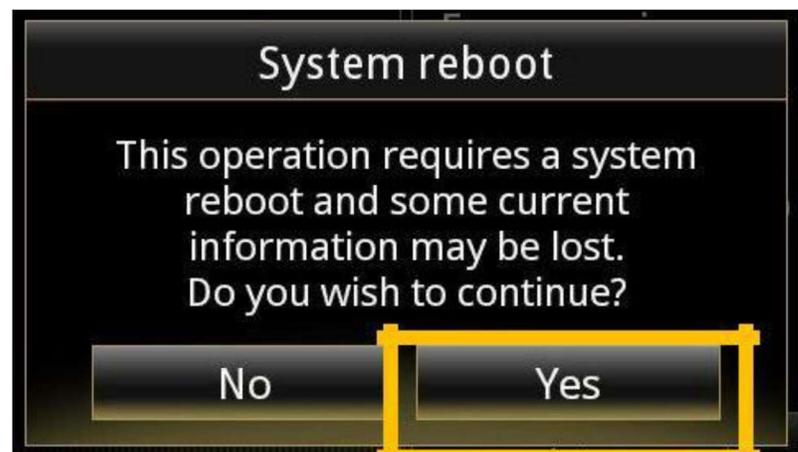

Software update detected. Please wait...

R-LINK 2 will automatically check the file integrity. Then the following screens will be displayed. Choose **“Yes” for all screens** to begin the installation process.

The screen will be black for a few minutes during the installation process.

The R-LINK 2 system may restart several times during the procedure. Rear camera and parking aid sensor will neither be available. **Do not unplug the USB.** A message on the R-LINK 2 will confirm that the installation is successful.

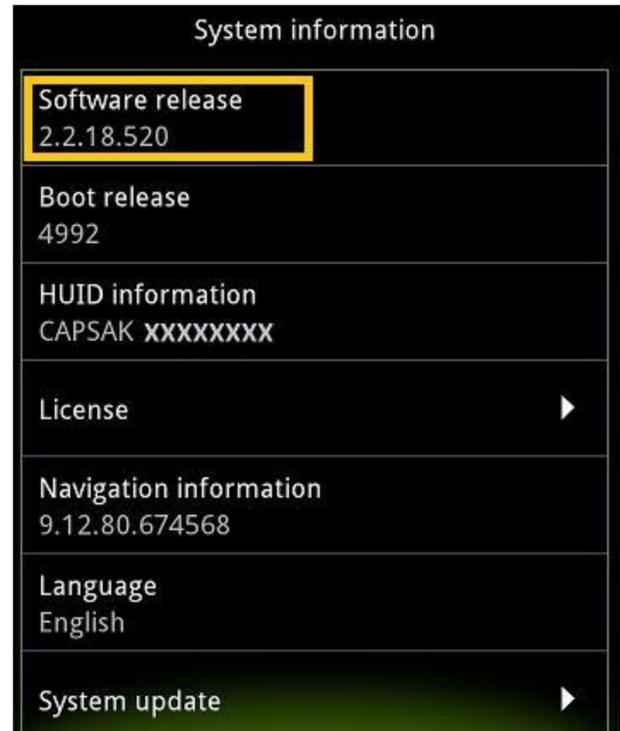

You can now remove the USB stick.

 Note that the installation of the new R-LINK 2 software will reset your navigation favorites and navigation history.

Final Check

You can double check if the software has installed correctly Menu->System->System Information. Example screen. The version's number is indicated at the time of the download

Do not forget to check if your R-LINK 2 system has the connectivity activated for LIVE Info Traffic

Please go to main menu on your R-LINK 2 and check if the connect button is showing. If connect button showing, follow the instructions below.

Press the "Connect" button. Accept the different conditions to allow connectivity (you can also fill in your email address (optional)).

The activation may take up to 72 hours.
